

14-Day Bootstrap 5 Learning Timetable

Week 1: Core Concepts, Layout, and Forms

- **Day 1: Setup & Containers**
 - **Concepts:** CDN links, Starter Template, container, container-fluid, Breakpoints (sm, md, lg, xl, xxl).
 - **Task:** Create an HTML file, link Bootstrap via CDN, and test different container widths.
- **Day 2: The Grid System**
 - **Concepts:** Rows, Columns, 12-column layout, Responsive classes (e.g., col-md-6), Gutter spacing.
 - **Task:** Build a 3-column layout that collapses into a 1-column layout on mobile devices.
- **Day 3: Content Formatting**
 - **Concepts:** Typography (Headings, Display classes), Images (img-fluid), Tables (table-striped, table-hover).
 - **Task:** Style a dummy blog post with headers, responsive images, and a formatted data table.
- **Day 4: Forms**
 - **Concepts:** Form controls, Floating labels, Input groups, Checkboxes, Radios, Form validation states.
 - **Task:** Build a responsive "Contact Us" form and a "Login" form using floating labels.
- **Day 5: Basic Components**
 - **Concepts:** Buttons (btn-primary, btn-outline), Button groups, Alerts, Badges, Progress bars.
 - **Task:** Create a UI kit page displaying all button variations, sizes, and a few alerts.
- **Day 6: Structural Components**
 - **Concepts:** Cards (titles, images, headers, footers), List Groups, Spinners.
 - **Task:** Build a product pricing grid using Bootstrap Cards with varying content.
- **Day 7: Mini-Project**
 - **Concepts:** Combine everything learned in Week 1.
 - **Task:** Build a basic Landing Page: Include a header, a grid of features (using cards), and a contact form at the bottom.

Week 2: Navigation, Interactivity, and Utilities

- **Day 8: Navigation**
 - **Concepts:** Navbar (responsive collapsing, brand, links), Navs & Tabs, Breadcrumbs, Pagination.
 - **Task:** Build a responsive Navbar that collapses into a hamburger menu on smaller screens.
- **Day 9: Interactive Components**
 - **Concepts:** Modals, Offcanvas (sidebars), Accordion, Carousel (sliders), Dropdowns.
 - **Task:** Add an image carousel to your landing page and a modal that opens when a button is clicked.
- **Day 10: Utilities: Spacing & Color**
 - **Concepts:** Margin/Padding classes (m-3, pb-2, mx-auto), Text colors, Background colors.
 - **Task:** Take an unstyled HTML page and use *only* spacing and color utilities to make it look decent.
- **Day 11: Utilities: Layout & Sizing**

- **Concepts:** Flexbox utilities (d-flex, justify-content-center), Display classes (d-none, d-md-block), Sizing (w-50, h-100).
- **Task:** Create a vertically and horizontally centered login box using Flexbox utilities.
- **Day 12: Customization**
 - **Concepts:** Overriding Bootstrap with custom CSS, working with CSS Variables.
 - **Task:** Change the primary brand color of your project without editing Bootstrap's core files.
- **Day 13: Final Project (Build)**
 - **Concepts:** Full responsive design architecture.
 - **Task:** Build a Portfolio Website or Admin Dashboard: Include a navbar, hero section, grid gallery, and footer.
- **Day 14: Final Project (Polish)**
 - **Concepts:** Testing across screen sizes, refining spacing, ensuring cross-browser compatibility.
 - **Task:** Open your project on your phone (or use browser dev tools to simulate a phone) and fix any overflowing layouts.
